## PROFESSIONAL EXPERIENCE

---

**US Foods**, Tempe, AZ

Aug 2012 - Present

### *Desktop Analyst Design Senior*

- Maintaining IT support systems, images, programs and software deployment tools.
- Designing desktop solutions to improve IT and user processes.
- Writing scripts to improve automation in deploying software and configuring client desktops and laptops.
- Modernizing Desktop/Laptop imaging solutions by implementing Microsoft Deployment Toolkit (MDT) using industry best practices, improving the time to deploy images and add support for new hardware.
- Created a One-Touch Client Windows XP to Windows 7 in-place upgrade processes using existing tools saving the company an estimated \$800,000 to upgrade the remaining 10,000 Windows XP clients.
- Development of Active Directory User Account Management software tool for the service desk, making it easier to service accounts while reducing the surface area for technician mistakes.

**Computer Sciences Corporation** Woodbridge, VA

Jan 2007 - Aug 2012

### *Lead Enterprise Desktop Architect & Junior Windows System Administrator*

- Deploying Software packages, upgrades, and patches within strict customer SLA's to ensure security in the Windows clients.
- Documenting environment changes, baselines, and procedures while following proper change control processes to ensure that environment changes can be referenced, audited, and properly approved.
- Developing and editing MSI software packages and transforms with AdminStudio, InstEdit or similar utilities.
- Documenting issues with software and provide point of escalation for difficult technical issues reducing time to solve issues and train new technicians.
- Managing AD Group Policy of Desktop and Laptop operating systems and software to maintain operating and security standards.
